

Cleaning Report

Author: Mpho
Dataset: Retail Store Sales
Date: 10/07/2026
GitHub: <https://github.com/Mpho048/Data-Cleaning>

Dataset: Retail Dataset

This report contains data
cleaning results and dataset
information.

Generated automatically using
Python and FPDF.

Dataset Preview:

Item	Price Per Unit	Quantity	Total Spent
Item_10_PAT	18.5	10.0	185.0
Item_17_MILK	29.0	9.0	261.0
Item_12_BUT	21.5	2.0	43.0
Item_16_BEV	27.5	9.0	247.5
Item_6_FOOD	12.5	7.0	87.5
nan	nan	10.0	200.0

Dataset Information

Rows	Columns	Missing	Memory Usage
12575	11	7229	5.62 MB

Column	Data Type	Missing
Transaction ID	str	0
Customer ID	str	0
Category	str	0
Item	str	1213
Price Per Unit	float64	609
Quantity	float64	604
Total Spent	float64	604
Payment Method	str	0
Location	str	0
Transaction Date	str	0
Discount Applied	object	4199

Key Cleaning Insights

1. Original dataset shape: 12575 rows and 11 columns.
2. Duplicate rows removed: 0
3. Missing Price Per Unit values were recovered using:
$$\text{Price Per Unit} = \text{Total Spent} / \text{Quantity}$$
4. Missing Item values were recovered using category relationships.
5. Missing discount values were assumed as False.
6. Rows missing Quantity or Total Spent were removed.
7. Transaction Date converted to datetime format.
8. Final dataset shape after cleaning: 11971 rows and 11 columns.
9. Dataset is now structured and ready for analysis.
