Dataset: PC & Laptop Dataset

This report contains data
cleaning results and dataset
information.

Generated automatically using
Python and FPDF.

Dataset Preview:

Price	Ram Size	Maximum Resolution	Screen Size	Release Year
\$303.68	8 GB	2160 x 1440	14 in	2021
\$399.99 to \$634...	nan	1920 x 1080	14 in	Refurbished in ...
\$175.00	16 GB	1920 x 1080	14 in	2019
\$84.99	4 GB	1366 x 768	11.6 in	nan
\$101.22	8 GB	1366 x 768	Minimum 12.5"	2015
\$49.99	4 GB	1366 x 768	11.6 in	2017

Dataset Information

Rows	Columns	Missing	Memory Usage
6620	23	92716	11.23 MB

Column	Data Type	Missing
Brand	str	2596
Price	str	0
Rating	str	6334
Ratings Count	float64	6334
Condition	str	616
Seller Note	str	5178
Processor	str	2783
Screen Size	str	2730
Manufacturer Color	str	6435
Color	str	4471
Ram Size	str	4508
SSD Capacity	str	3840
GPU	str	3532
Processor Speed	str	3951
Type	str	3331
Release Year	str	5833
Maximum Resolution	str	4140
Model	str	3472
OS	str	3580
Features	str	4115
Hard Drive Capacity	str	4288
Country Region Of Manufacture	str	6417
Storage Type	str	4232

Data Cleaning Summary

- 1. Loaded and inspected the dataset.**
- 2. Removed duplicate records.**
- 3. Extracted the currency symbol from the price column.**
- 4. Converted product prices to numeric values.**
- 5. Split maximum screen resolution into width and height columns.**
- 6. Converted screen size measurements to numeric values.**
- 7. Standardized release year values.**
- 8. Filled missing numeric values using the median.**
- 9. Filled missing categorical values with 'Unknown'.**
- 10. Final dataset shape after cleaning: 4475 rows and 23 columns.**
- 11. Removed unnecessary columns (Seller Note, Condition, and Maximum Resolution).**
- 12. Verified the dataset after cleaning.**
- 13. Prepared the dataset for exploratory data analysis.**
